Skills

Javascript, HTML5, CSS3, Typescript, Reactjs, ExpressJS, Node.js, TailwindCSS, Firebase, REST, HTTPS, Linux, Computer literacy

Projects

- 2024 - [Reread](#) - Your Personal library for adding your favorite quotes and notes on your digital book.
 - 2024 - [Fzaid Blog](#) - A dynamic website that can be updated via an API to add, delete and update the contents of a blog website using a separate content editor application that integrates the API.
 - 2023 - [Vimnotes](#) - A keyboard oriented markdown note-taking app using vim key-binding, I created Vimnotes to help me become more efficient in taking down notes while I was studying Software Development.
 - 2023 - [Warframe event status](#) CLI - A CLI program to fetch and display the current events of the game in the terminal.
 - 2023 - [Manual web scraper](#) - I was requested to manually scrape multiple emails on a website and place them on an excel sheet, so I built this basic CLI program to help ease the work where instead of manually scraping each emails I was able to automate it which then outputs them to an excel sheet.
 - 2023 - [Website time tracker](#) - Chrome extension that tracks the time a user has spent on a website and counts how many times they have visited it.
-
